## Housing affordability and the next generation

2026 [Science for policy](#) [Economic and monetary Union](#)

**Subtitle:** Youth precarity in the EU

**Abstract:** • Housing affordability has deteriorated sharply for younger generations across most EU Member States • Young people face growing housing precarity, driven by high costs, insecure tenure and limited access to ownership • Housing crises take different forms across Europe, but income strongly shapes exposure to housing issues and housing precarity • Intergenerational gaps in housing access threaten long-term economic security and social cohesion
